

Windows Server 2012 R2 - Remove "no internet access" Warning on NICs

1. Right click Start Button and select Run
2. Enter: gpedit.msc and Ok
3. In the Local Group Policy Editor Navigate to: Computer Configuration > Administrative Templates > Network > Network Connections; on the right pane double click the policy setting "Do not show the local access only"
4. On the dialog box select Enable, then Apply and Ok
5. Close the windows
6. Right Click the Start Button and select Command Prompt (Admin)
7. Enter gpupdate and then enter
8. Log off and Log in, the warning will not appear anymore
